CNF BOOSTERS

GRANULATED SOIL CONDITIONER

Our Premium Quality Bentonite Soil Conditioner is widely used fertilizer because it can release nutrients slowly over time, providing a sustained and efficient source of nourishment for plants. This unique characteristic of bentonite makes it a valuable option for enhancing soil fertility and promoting healthy plant growth. And it offers a controlled-release mechanism, Bentonite can be applied to the soil in various forms, including granules, powders, or mixed with other fertilizers. Its versatility allows for easy integration into existing agricultural practices, making it suitable for a wide range of crops and cultivation systems.

FEATURE & BENEFITS :

- It enhances soil structure and porosity, promoting better water infiltration, root penetration, and nutrient uptake by plants.
- It releases nutrients slowly so that the plant gets nutrients for a long time.
- It improves soil structure.
- It increases water-holding and moisture retention in soils.
- It increases crop yield.

HANDLING & STORAGE:

- Minimized dust generation and accumulation
- Provide appropriate exhaust ventilation, at places where dust is formed
- Do not taste or swallow
- Avoid breathing dust, avoid contact with eyes
- Avoid prolonged exposure
- Wear appropriate personal protective equipment
- When using, do not eat, drink or smoke
- Wash hands thoroughly after handling
- Practice good housekeeping

SUGGESTED DOSE OF APPLICATION

CROPS: ALL CROPS
DOSAGE: 300-400Kg/ha
PACKAGING: Packing - 50 kg HDPE Bag

CONDITION FOR SAFE STORAGE:

- Store in original tightly closed container.
- Keep container tightly closed.
- Store in a well ventilated place
- Store away from incompatible materials.

CONDITIONS OF SALES:

Seller warrants that this product conforms to the chemical description and is reasonable fit for the purpose stated on this label when used in accordance with the directions under normal conditions for use.
